<b>Curriculum Vitae</b> * CV must be written in English		
<p>Dr. Alexander Drilon is the Clinical Director of the Early Drug Development Service and an Assistant Attending Physician of the Thoracic Oncology Service at Memorial Sloan Kettering Cancer Center in New York. His research focuses on the development of targeted therapy for genomic subsets of lung cancer and other solid tumors, including cancers that harbor fusions involving ALK, ROS1, RET, and NTRK1/2/3, and MET exon 14 skipping alterations. He is a recipient of American Society for Clinical Oncology (ASCO)/Conquer Cancer Foundation Career Development and Young Investigator Awards, and grants from the International Association for the Study of Lung Cancer and the Lung Cancer Research Foundation. Dr. Drilon is also a member of the Editorial Board of ASCO University.</p>
