

AACR Abstract Submission Guidelines

Authors who submit an abstract of a paper confirm that they have not previously published these data, that they have not previously presented them at a large national annual scientific meeting, and that they are not planning to present or publish them prior to the dates of this AACR conference.

The Conference Cochairs will evaluate the scientific quality of the submitted abstracts on the basis of the following criteria: novelty of the research, significance of the findings, and clarity. Authors should be particularly cognizant of the importance of setting forth the objectives and hypotheses of the study in a clear, succinct manner and of summarizing the new, unpublished results. If an abstract is poorly written such that the Conference Co-Chairpersons cannot determine its novelty and importance, the paper will not be accepted for presentation at the conference.

Authors submitting abstracts for presentation at this AACR conference should consider the following:

1. Abstracts must describe in a succinct manner the purposes and results of the research so that the quality, originality, and comprehensiveness of the work can be evaluated by the Conference Co-Chairpersons. Each abstract should contain: (a) an introductory sentence indicating the purposes of the study; (b) a brief description of pertinent experimental procedures; (c) a summary of the new, unpublished data; and (d) a statement of the conclusions. Authors must accept sole responsibility for the statements in their abstracts. American spelling should be used throughout.
2. Titles should be indicative of the content of the abstract. All words necessary to identify the subject matter should be included in the title to facilitate electronic retrieval (if applicable). Avoid nonstandard abbreviations in abstract titles.
3. Abbreviations may be used in the body of an abstract if they are defined at their first mention in the text. Complex therapeutic regimens must be identified.
4. The body of your abstract may not exceed 2600 characters, excluding spaces. Please note: figures and tables are not permitted. The author and institution list is not included in the character limit. The online submitter will not accept abstracts that exceed this limit.
5. For any scientific nomenclature requiring italics, superscript, or subscript, please type the following tags around the content to be formatted. It is your responsibility to include proper tags. The tags and formatting will not be reflected in your final preview of your submission, but will appear in the published abstract.

Italics tag = `<i>...</i>`

Example: `<i>Apc</i>` will result in *Apc*

Superscript tag = `^{...}`

Example: `10⁻⁸` will result in 10^{-8}

Subscript tag = `_{...}`

Example: `10% O₂` will result in 10% O₂

6. PLEASE NOTE: The AACR is committed to the advancement of cancer research and the cure and prevention of cancer through the facilitation of communication and full dissemination of knowledge among scientists and others dedicated to the cancer problem. Therefore, the AACR requires strict compliance with the following regulation:

- When biological or chemical data pertaining to chemical entities are an integral part of the research, the chemical structure, method of preparation, and patent or reference numbers must

be presented. If for any reason this information cannot be provided when the paper is presented at the conference, the abstract on this work should not be submitted for consideration.

7. Please make sure your abstract contains only generic drug names. Abstracts with trade names in the title or body may be precluded from presentation.
8. Because of administrative and time constraints, supplemental data submitted along with the abstract cannot be transmitted to the Conference Cochairs for review.
9. The accuracy of the submitted abstract is the responsibility of the authors. Every effort will be made to publish the abstract exactly as submitted. Authors should prepare and proofread their abstracts carefully prior to submission. Errors made on your submitted abstract are likely to appear in print.
10. Authors are strongly encouraged to print a hard copy of their abstract for their records before submitting.
11. All PRESENTERS must register to attend this AACR conference.
12. If an abstract is accepted and the PRESENTER does not register, the abstract may be withdrawn.
13. Abstract submitters will receive an initial notification of receipt in the form of a confirmation email. Notifications of abstract receipt will also be sent to the PRESENTER.
